

CLAIM AMENDMENTS

This listing of claims will replace all prior versions, and listing, of claims in the application:

Listing of Claims:

Claim 1. (Currently Amended) An interior light assembly for motor vehicles, the interior light assembly comprising:

a frame having a frame opening and defining an interior of the interior light assembly;

at least one lens connected to the frame and filling out the frame opening;
wherein the at least one lens includes a first lens portion and a second lens portion; and

at least one illumination element and at least one electroluminescent film arranged within the area of the frame opening behind the at least one lens in the interior of the interior light assembly so that light emitted by the at least one illumination element and the at least one electroluminescent film passes from the interior through the at least one lens arranged in the frame opening for illuminating a vehicle interior passenger compartment;

wherein the light transmitted through the first lens portion is of a first intensity and the light transmitted through the second lens portion is of a second intensity, wherein the first intensity is greater than the second intensity.

Claim 2. (Currently Amended) The interior light assembly according to claim 1, wherein the at least one ~~electroluminescent~~ electroluminescent film is attached to a backside of the at least one lens facing the interior of the interior light assembly.

Claim 3. (Currently Amended) The interior light assembly according to claim 1, wherein the at least one electroluminescent film ~~has~~ has a contour identical to a contour of the at least one lens.

Claim 4. (Previously Presented) The interior light assembly according to claim 1, wherein the frame surrounds the at least one lens.

Claim 5. (Previously Presented) The interior light assembly according to claim 1, wherein a first one of the at least one lens is correlated with the at least one illumination element and a second one of the at least one lens is correlated with the at least one electroluminescent film.

Claim 6. (Previously Presented) The interior light assembly according to claim 5, wherein the first lens for the at least one illumination element is smaller than the second lens for the at least one electroluminescent film.

Claim 7. (Previously Presented) The interior light assembly according to claim 5, wherein the first lens for the at least one illumination element has a backside facing the interior of the interior light assembly and provided at least partially with at least one optic.

Claim 8. (Previously Presented) The interior light assembly according to claim 7, wherein the at least one optic is comprised of serrations or corrugations.

Claim 9. (Previously Presented) The interior light assembly according to claim 1, wherein the at least one illumination element is an incandescent light bulb.
